P R E F A C E.

AT the close of the first volume of the *Assurance Magazine*, the Editors pause to express their thanks to the many friends who have kindly contributed to its pages, and who have still more kindly been at the pains to exert their influence for the extension of its circulation.

This needful support has been the more grateful, inasmuch as it has shown not only that the objects with which the Magazine was established are generally appreciated, but that the conduct of it with a view to the attainment of those objects has been thus far approved.

Under such auspices, the Editors cheerfully resume their labours, resolved to let no means escape them which may be calculated to advance the character of the undertaking, or to increase the utility of it.

London, 1851.
